Steer the course and sail to an island called style. Searson is the result of chair makers who decided to design a chair that just works. Functionally, it is a pleasure to sit in as the durable ribbed vinyl back provides natural posture support. The seat cushion comes well padded, while the armless construction makes this a perfect piece for conference rooms and desk work. Searson's chrome-plated aluminum base is fitted with five dual-wheel casters, while a tension knob and tilt lock allow for easy back position adjustments. This is a chair made for the modern office and a welcome embodiment of the spirit of progress and determination. Set Includes: One - Searson Mid Back Office Chair
