J&M is proud to introduce our new Premium Bedroom Collection. Made in Portugal, Europe's furniture center, and hand crafted to perfection by skilled artisans using the latest state of the art technology as well as years of experience; these bedrooms are the pinnacle of artistry in furniture manufacturing. J&M's premium bedrooms are crafted from the highest quality materials. We use hand-selected woods, wood veneers and natural lacquers as well as the finest German hardware by Blum. There is no doubt that these are our finest bedrooms yet. The Porto premium bedroom features an elegant design beautifully mixing a natural light grey lacquer finish which looks striking against the natural wenge wood veneer. The headboard shows off uniquely carved diagonal lines which look spectacular when the built in LED lights featuring a dimmer function are on. The interplay of wenge with light grey continues in the night stands, chest, and dresser. As with all of J&M's premium collection bedrooms the case goods come equipped with soft closing tracks by Blum, a world-renowned German manufacturer that sets the standards for the finest quality furniture hardware.
