Made from a slice of wood into which aluminum has been poured, the Molten Small Silver Side Table is an example of how Mother Nature's creations can be enhanced. We're not afraid to bring an elemental material a hint of bling at Phillips Collection, as this reflects the ethos that we personify: modern organic. The undulant shape of the sliced wood tabletop makes this one of nature's treasures that will fit beautifully within a number of different styles—from Modern Farmhouse and Boho Chic to traditional and transitional. This piece is crafted with natural solid wood. Color and character of wood grain may vary and natural cracking will result in the aluminum fill pattern to differ from piece to piece.
